## **ATEX / IECEx Motors:**

These series of motors are capable of withstanding pressure during an internal explosion so that such an explosion does not vent into the external atmosphere which could also be explosive.

They are also designed to prevent the occurrence of sparks, arcs, or hot spots in service, which avoids any further risk of explosion.

## **Impressive Design Features and the main characteristics:**

- Three-phase, 50Hz
- Squirrel cage rotor
- Class "F" insulation
- Degree of protection IP55
- All Cast Iron frame
- Machined metal to metal surface between frame and terminal box
- Non-contact Seal
- Reinforced set screws
- Specified minimum values for creepage distances and clearances
- Tracking-proof isolating materials
- Six leads terminal block
- Suitable for outdoor use

## **Application**

- Chemical and petrochemical industry
- Production of mineral oil and gas
- Flour / feed mills
- Grain elevators
- Fans
- Pumps
- Blowers

## **Optional Feature:**

- Space heater

**Hazardous area – Zone classification**
